Cameron Winter - Take It With You

[Intro] - E

[Verse 1]
```
E                                F#m
You can walk as far East as the map goes
E                                  B     B7
Or farther West than walked the pioneers
A                        E
You can sail down South, where the chocolate trees grow
B                       E
... But you can’t stay here

E                                  F#m
Cowboy North till you reach the Dakotas
E                               B    B7
Ride the highways in your Cadillac
A                                  E
You could make a fortune panning gold in Sarasota
B                    E
... Just don’t come back
```

[Refrain]
```
  A       B           E          F#m           G#m
I found a keepsake of you by the window in the kitchen
A     B                          E    Esus    E
Baby, take it with you when you leave
```

[Verse 2]
```
       E                                F#m
If you ever get the ache some cold December
   E                                  B   B7
To knock again upon your old front door
A                                  E
If you’re aching to come home, remember
B                    E
... It’s not here anymore
```

```
     E                                F#m
Your travelling companion will be memories
        E                                      B     B7
You can lie awake with thoughts of simpler times
        A                     E
You can love me from afar if that's what puts you at ease
B                             E    Esus   E
... But you won't be on my mind

[Interlude] |:A B F#m E :|

[Refrain]
  A       B           E           F#m G#m              A
I found a keepsake of you in that old wardrobe in the cellar
B                            E   Esus   E
Take it with you when you leave
```
